My Mission Hello, I'm Joshua Bergman. I like dogs and cows. I've completed two freelance web dev projects - one for a castor startup and another for a local frame shop where I increased the conversion rate of new customers by 50%. As a developer creating solutions that I can feel the value of is what drives me, which is why I'm excited to have recently released [Too Simple Analytics](#), an analytics app with a whopping 14 users. (See TSA in projects) Additionally, I've engineered a range of efficient tools, such as a workflow automation tool, word bank search, analytics platform, and a password manager. My core expertise lies in frontend development with React, but I'm equally proficient in full-stack and backend development, having crafted multiple robust backends using Node, Express, and MongoDB.

Projects

Too Simple Analytics ([Source Code](#))

<https://toosimpleanalytics.com>

Too Simple Analytics started out as a personal script for tracking views of my projects. After a while of using this program I started to desire additional features, of which I couldn't find for a reasonable price from an existing solution. Too Simple Analytics aims to provide a meaningful feature set for an affordable price all while focusing on ease-of-use, privacy, and speed.

Portfolio ([Source Code](#))

<https://joshuabergman.dev>

My portfolio is a showcase of my journey as a developer. Features a custom GitHub display component, my repositories, key projects, and about me. This project reflects my passion for web development and my commitment to continuously improving.

Algo Example ([Source Code](#))

<https://algoexample.com>

Algo Example is an educational platform dedicated to the exploration of data structures and algorithms. Offering interactive algorithm visualization, engaging user interactions, and interactive games, Algo Example represents a passionate collaborative effort.

Auto CL ([Source Code](#))

<https://autocl-abb1d.web.app>

Auto CL stands for "Auto Cover-Letter". It is a lightweight AI web app that bridges the gap between templated cover letters and time-consuming original cover letters. The application allows you to focus on your connection to a company and takes the focus off of writing.

Skills

Javascript,
Typescript,
React, HTML,
Node.js, CSS,
Express.js, Git,
MongoDB, Jest,
Docker, Postman,
Rest API, Python,
Frontend, AGILE,
Backend, SCRUM,
FullStack, Redux,
Database,
Automation,
React Hooks,
Windows, Linux,

Work Experience

Freelance Web Development

Eagan, MN

- Completed two major freelance projects see on my portfolio: joshuabergman.dev

Closing Expert, Target

Eagan, MN Sep 2019 - June 2022

- Routinely received top performer awards & other awards in recognition of hard work and excellence in customer service.
- Led small teams to timely & efficiently carry out store projects.

Education

[Metropolitan State University](#)
Computer Science(35 Credits)

Certifications

MongoDB Node Developer
Certified PC Pro
